StartupBuddy

V0.01 · BETA PRODUCT OVERVIEW · OCTOBER 2026

Your AI cofounder for the busywork.

Invoices, GST, payments, clients, tasks and team letters, run by talking to a cofounder who drafts everything and waits for your tap.

01 THE IDEA

Run your company by talking to it.

Small companies lose hours every week to back-office work: raising invoices, chasing payments, logging expenses, tracking GST, writing offer letters. StartupBuddy puts all of it behind one chat. You say what happened, your AI cofounder turns it into the right record, and nothing is saved until you approve it.

STEP 1

Talk

Type, speak, call or message on Telegram. “Paid ₹12k for team lunch” or “Quote Zephyr for phase 2”.

→

STEP 2

Review

Every change shows up as a card with the details filled in. Edit it or cancel it.

→

STEP 3

Tap. Done.

It's logged, sent or created, and you can undo it.

★ Pick a cofounder. Same skills, different personality.

Mira
Numbers-first

Arjun
No fluff

Tara
Hype partner

Neel
Detail checker

Dia
Negotiator

Sam
Cool head

▦ Five sections, one app

Home
Your command centre. Brief, deadlines and what Buddy noticed.

Work
Tasks and projects.

Buddy
Chat and call your cofounder.

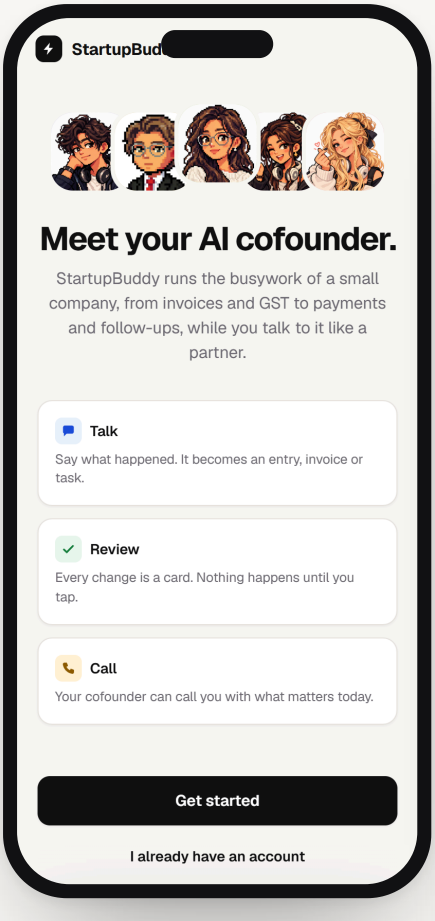

Business
Money and clients in one hub.

Team
People, letters and Telegram.

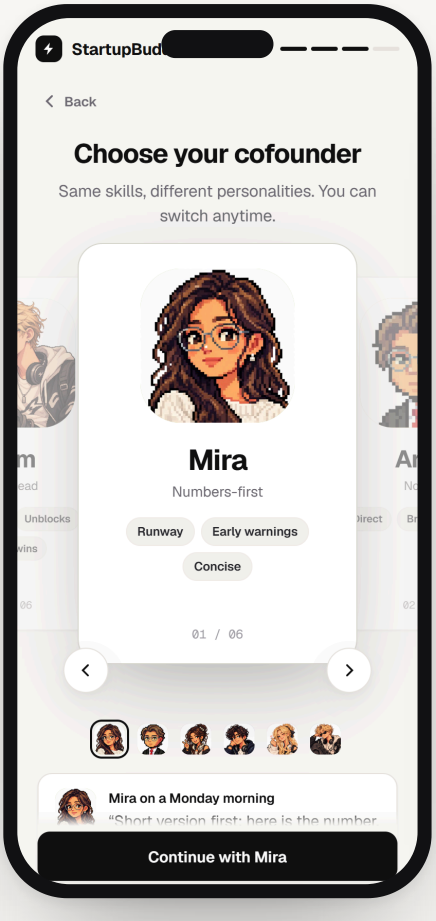

Settings for the company, GST, Gmail and your plan now live under your company profile.

Set up in about two minutes.

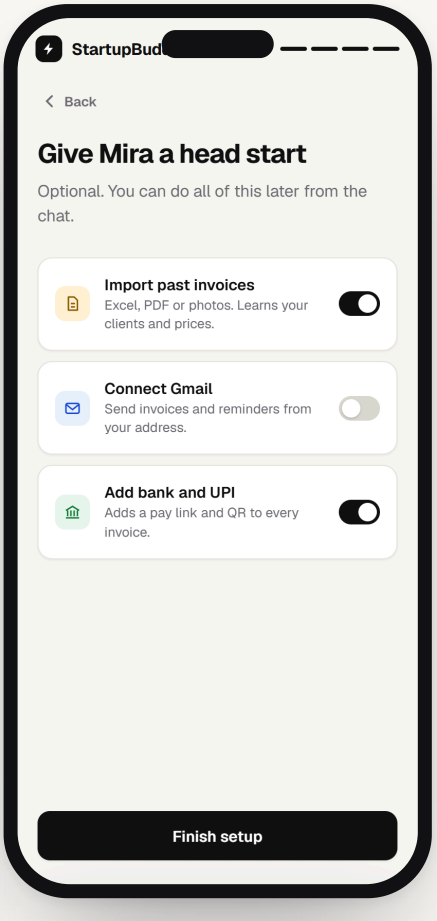

Sign in with Google or email, add your company and GST state, choose your cofounder, then optionally give them a head start. Your cofounder then calls you with a quick intro.

WELCOME

CHOOSE YOUR COFOUNDER

HEAD START

Google or email sign-in

One account and one company workspace. Invite teammates later.

Hear before you pick

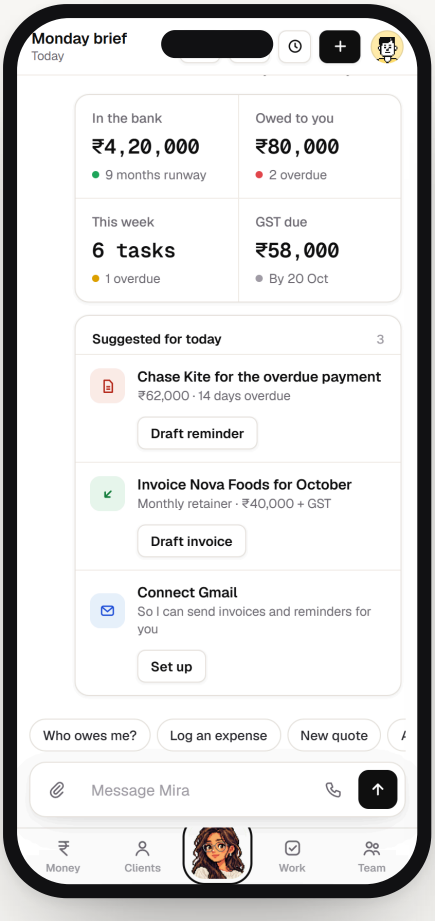

Swipe through the cofounders and play a voice sample of each one.

Optional head start

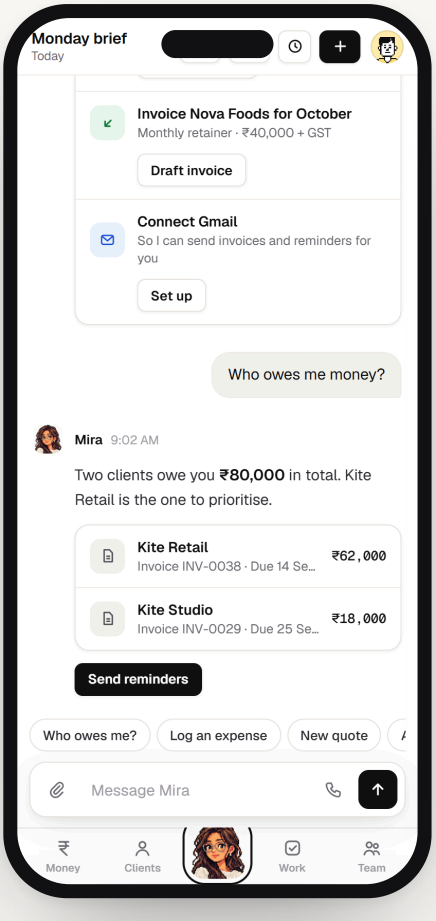

Upload your files, connect Gmail and add bank and UPI details. You can skip any of these.

Every morning starts with a brief.

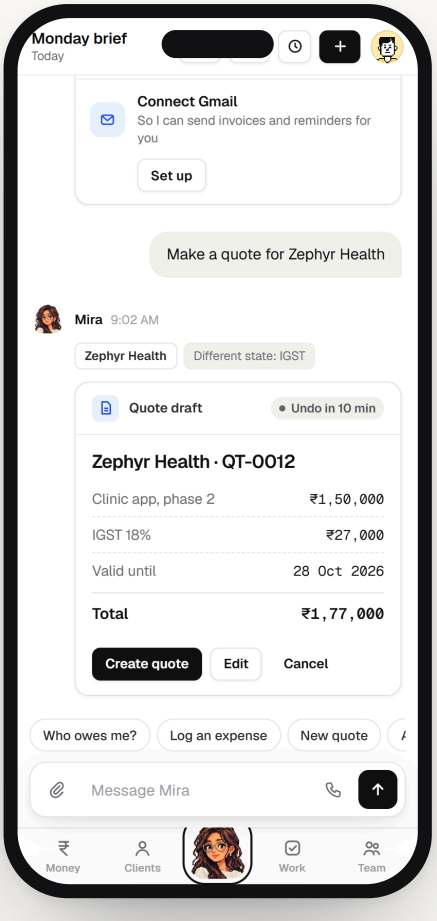

Chat opens with today's numbers: cash in the bank, who owes you, tasks this week and GST due, followed by a short list of what to do next. Ask questions or tell it what happened, and it replies with cards you can act on.

DAILY BRIEF

ASK ANYTHING

CONFIRM A DRAFT

✓ Nothing without your tap

Expenses, quotes, reminders and tasks arrive as cards with Confirm, Edit and Cancel.

? It asks when unsure

If something is missing, such as what the ₹12k was for, it asks you with quick-pick options.

↺ Undo and history

Undo any action shortly after confirming it. Past chats are saved and easy to reopen.

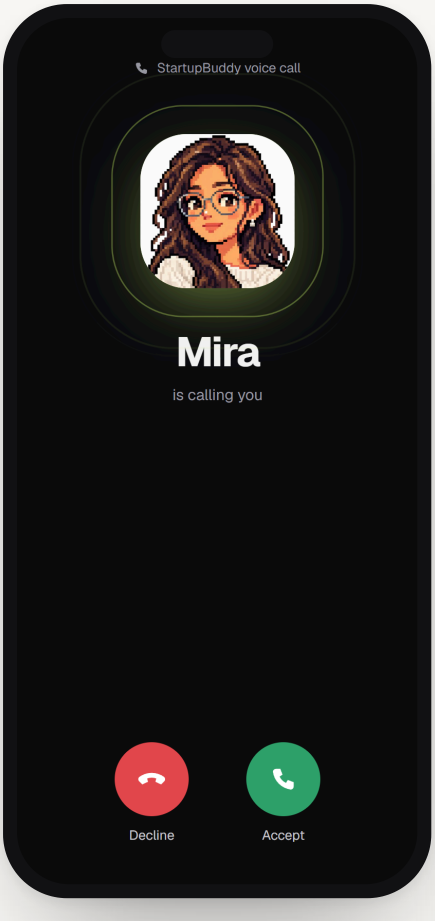

/ Slash commands and the + menu, for when you'd rather skip typing

`/invoice` `/quote` `/expense` `/income` `/task` `/client` `/offer` `/nda` `/call` `/help`

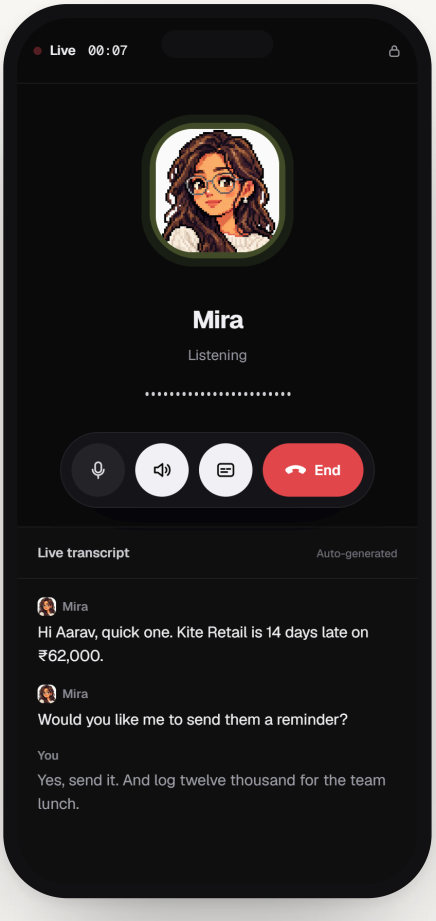

04 VOICE CALLS & COMPANY MEMORY

Call your cofounder. It calls you back.

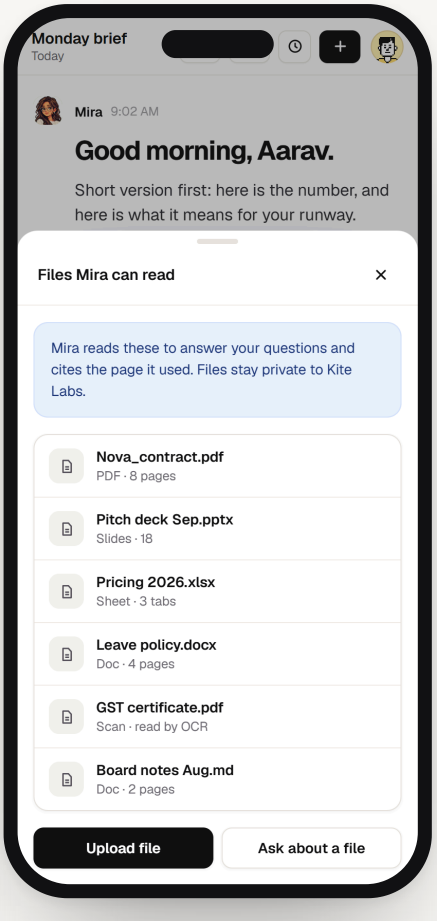

Talk it through when typing is too slow. Your cofounder listens, answers from your real numbers, shows a live transcript and puts actions on screen for you to approve during the call. After the call, a summary is added to your chat.

INCOMING CALL

LIVE TRANSCRIPT

FILES IT CAN READ

Own voice for each cofounder

Each persona has its own voice, greeting and style. Mira is brief, Tara cheers you on.

Company memory

Upload contracts, decks, sheets and policies. Answers cite the page they came from.

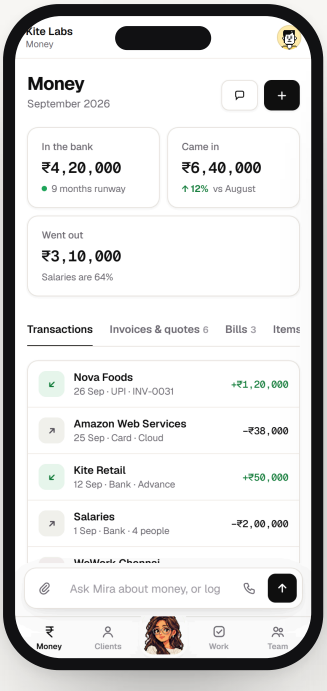

Private to your company

Files, chats and calls stay inside your workspace.

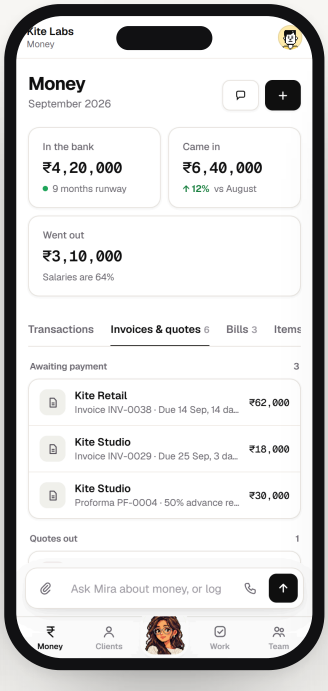

05 MONEY

All your money on one screen.

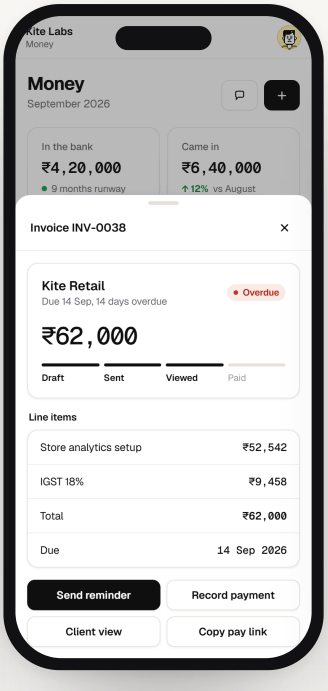

Cash in the bank, money in and money out this month, then five tabs: Transactions, Invoices & quotes, Bills, Items and Reports. Made for Indian businesses, with GST, UPI and ₹ formatting built in.

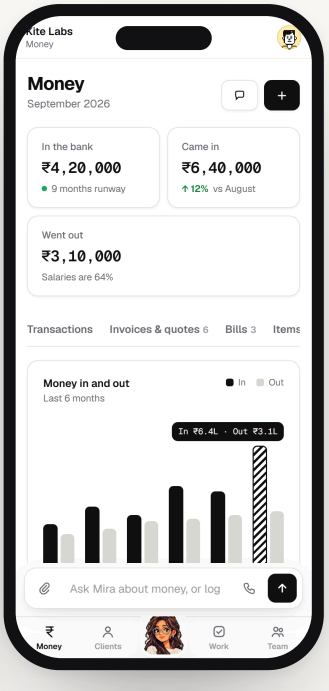

TRANSACTIONS

INVOICES & QUOTES

INVOICE DETAIL

REPORTS

Invoices, quotes, proformas

A step-by-step editor with saved drafts and a PDF preview. Convert a quote into an invoice in one tap.

Get paid faster

Track each invoice from Draft to Sent, Viewed and Paid. Send reminders by email with a UPI pay link.

Client portal

Clients open a private link to view, accept or pay. You can see when they've opened it.

Bills & expenses

Log what goes out with a category, GST and receipt. Vendors are added on the fly.

Items catalogue

Saved products and services with GST rates and SAC codes, ready to add to any invoice.

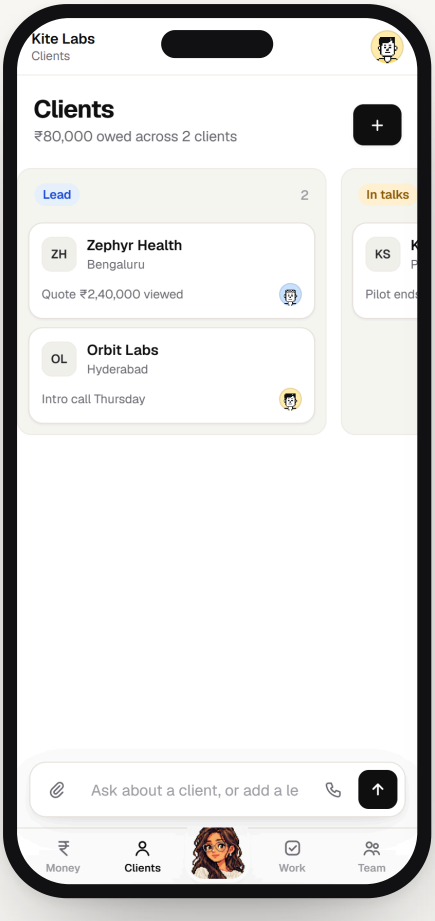

Reports

Six months of money in and out, plus a monthly profit and loss and GST summary.

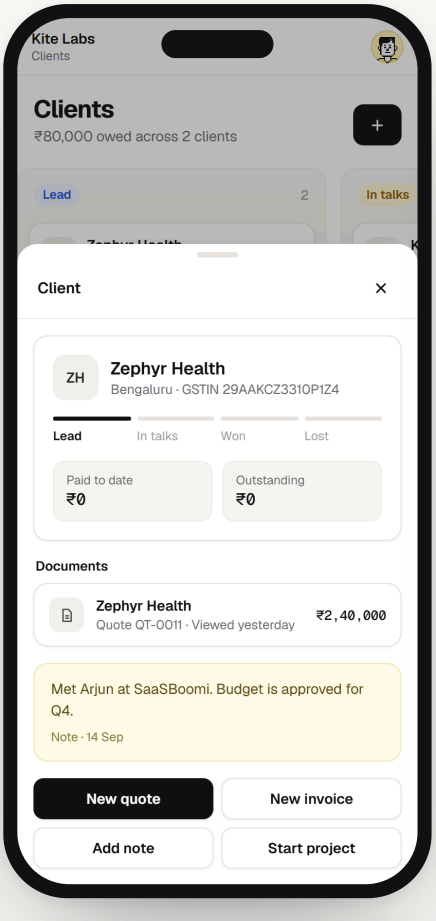

06 CLIENTS & WORK

From first hello to work shipped.

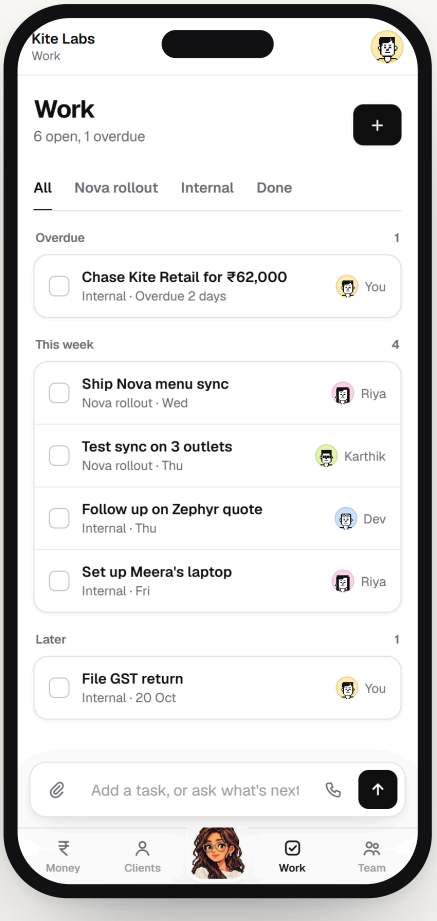

Clients move across a simple pipeline: Lead, In talks, Won and Lost. Each client card shows what they've paid, what they owe, their documents and your notes. Work keeps your team's tasks grouped by project and due date.

CLIENT PIPELINE

CLIENT CARD

TASKS

Pipeline stages

Move a client to the next stage in one tap. Outstanding amounts are always shown.

Quote from the card

Start a new quote, invoice, note or project directly from a client's card.

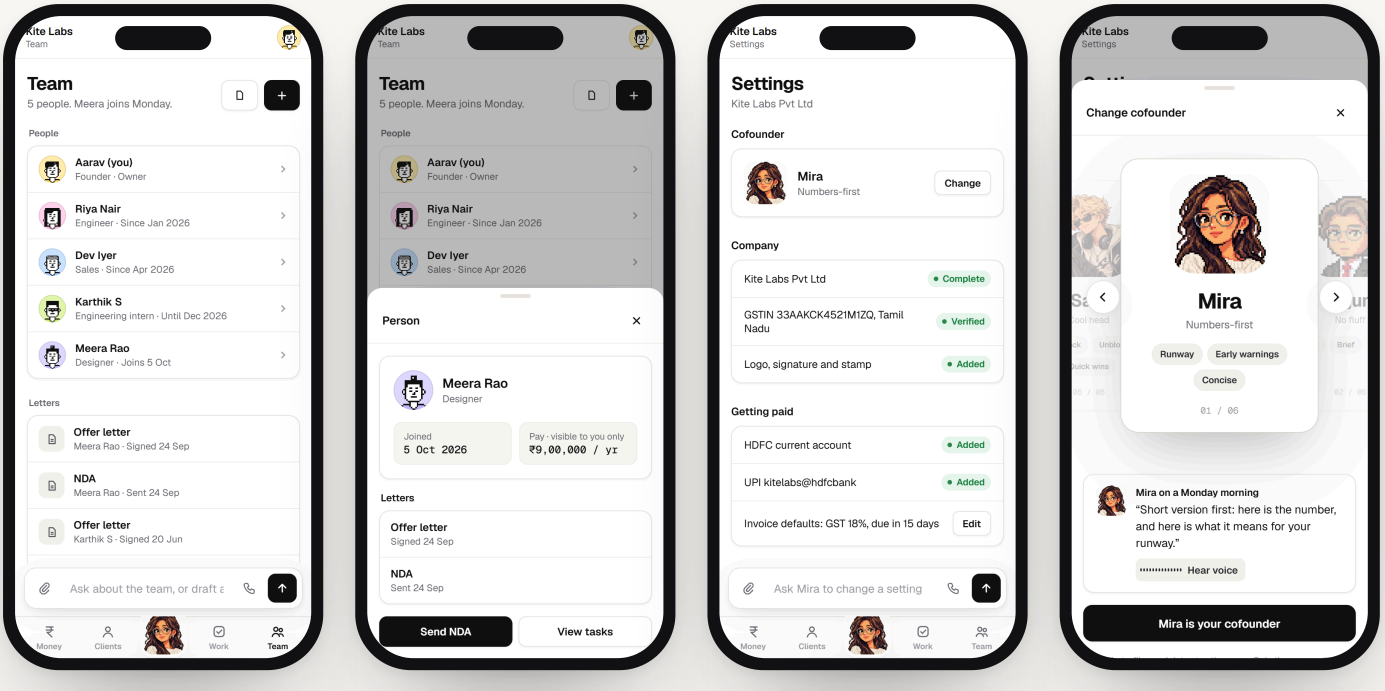

Tasks that chase you

Overdue, this week and later. Assign tasks to teammates and get nudged before deadlines.

07 TEAM & SETTINGS

People, letters and the basics.

Keep everyone on your team in one list and send offer letters and NDAs that they sign online. Settings holds your company profile, GSTIN, logo and signature, bank and UPI details, Gmail sending and your choice of cofounder.

TEAM PERSON SETTINGS SWITCH COFOUNDER

Offer letters & NDAs

Draft, send by email and track each letter from Sent to Opened to Signed.

Company profile

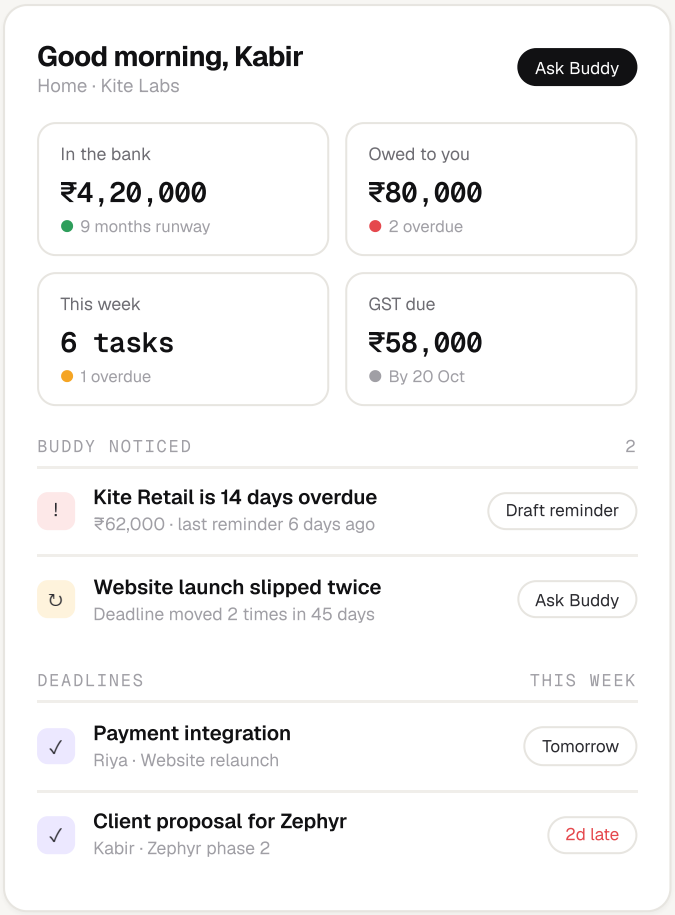

GSTIN, logo, stamp, signature and invoice defaults are used in every document.

Send from your Gmail

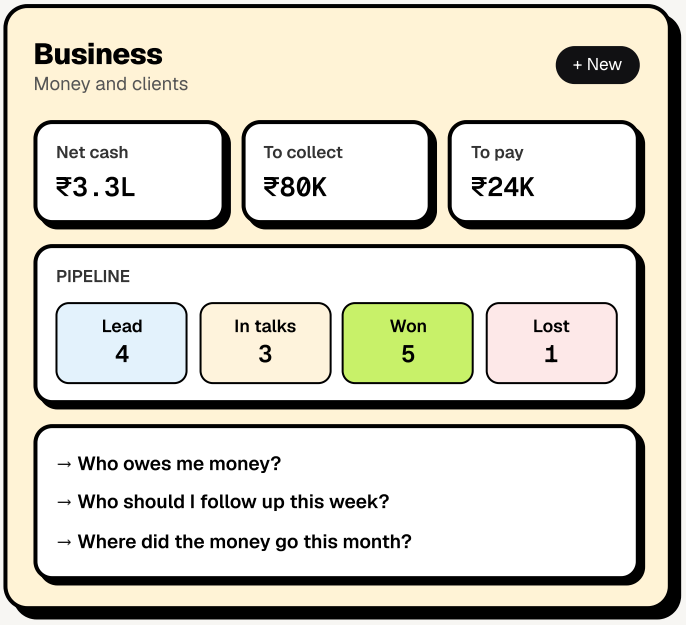

Invoices, reminders and letters go out from your own address.

A command centre for the whole company.

Home is the new first screen: today's brief, the deadlines that matter, active work and what each client owes, with every row one tap from the screen that owns it. Business brings Money and Clients together into one hub with its own overview.

HOME

BUSINESS · NEW LOOK

Home first

Opens on the brief: four figures, suggestions for today, deadlines, active work and client items, sorted by what's soonest or most owed.

Business hub

Net cash, money to collect and to pay, the client pipeline and quick actions. Money and Clients tabs sit inside it.

A bolder look

Home, Work, Business and Team have a new bold style with thick outlines and solid shadows. Every old link still works.

From one task to a whole plan.

Your cofounder, now called Buddy, can take on a goal as well as a single task. It proposes a plan with several steps that you check over and approve once. It spots problems in your data before you ask. Answers come with live views built from your real numbers.

Plan · Website relaunch
"We launch the new site in two weeks"

4 steps

- [x] Create project "Website relaunch"
  Due 24 Oct · owner Kabir
- [x] Task: final copy for the homepage
  Riya · due 15 Oct
- [x] Task: payment integration
  Arnav · due 20 Oct
- [ ] Task: launch announcement
  Unticked: skipped on approve

Why: two weeks gives each piece one owner and a deadline before launch day.

Edit | Approve plan

A PLAN CARD

Who owes us money?
A live view from your invoices

Outstanding	Overdue
₹80,000	₹62,000
3 invoices	1 client

BY CLIENT

K	**Kite Retail** INV-0038 · 14 days overdue	₹62,000
Z	**Zephyr Studio** INV-0041 · due 18 Oct	₹18,000

Short version: ₹80k is out. Heads-up: Kite Retail is the one to chase today.

Open invoices | Send reminder…

A LIVE VIEW

☰ Plans you approve once

Untick or edit any step, then approve. If a step fails, the others still run, and you can retry just the failed ones. Undo reverses the whole plan.

! Buddy noticed

Overdue invoices, slipping deadlines, quiet leads, quotes left waiting, unusual spending and bills due. Each one comes with a reason and a next step.

▤ Live views

Figures, lists and timelines built from your real data. The numbers always come from your records, never from the AI.

@ Payment reminders

Buddy drafts the exact email. Sending it needs a named button, because money and email always get a careful review.

» Faster replies

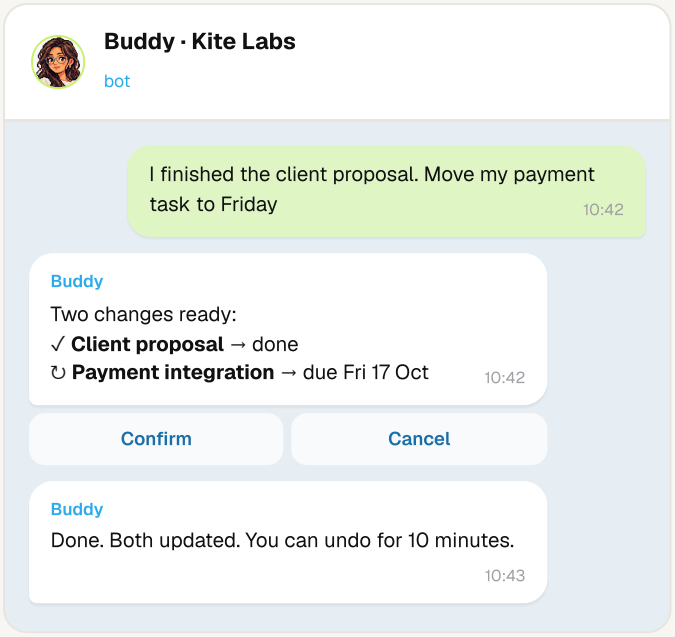

A status shows the moment you send. Setup runs in parallel and company memory is fetched only when it helps.

⌁ One Buddy everywhere

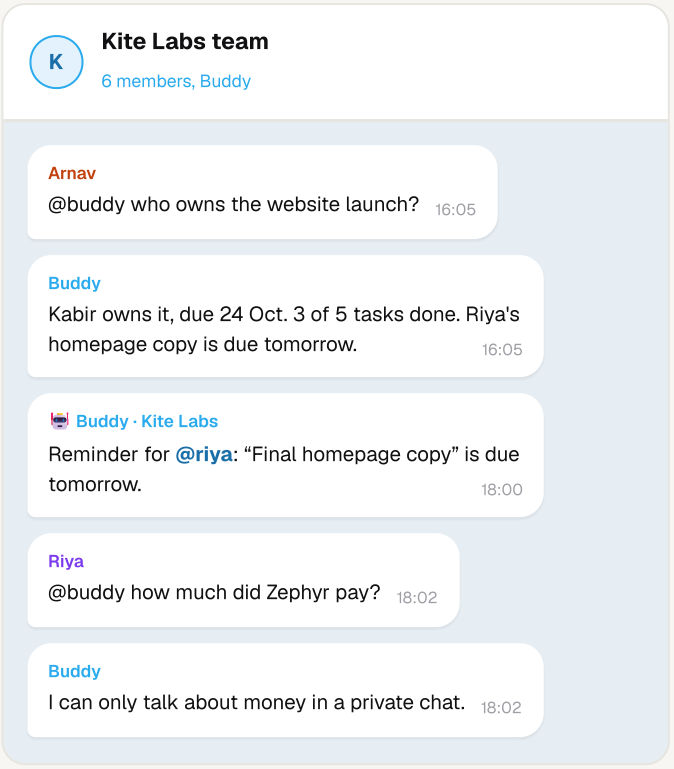

Chat, calls and Telegram share one brain and one approval flow, and every action lands in one history.

Your whole team, one chat away.

Connect Telegram and Buddy works where your team already talks. Founders get the full Buddy in a private chat. Teammates can update their work without a StartupBuddy login. In the team group, Buddy answers questions about work and keeps money private.

A TEAMMATE'S PRIVATE CHAT

THE TEAM GROUP

Private chat

Ask, update tasks, log blockers and approve cards with buttons. Anything that touches money or sending gets a Review in StartupBuddy button and is confirmed with a second tap.

No login needed

An admin sends a one-time invite to anyone in Team. They use Buddy with their own permissions, and can never delete anything.

Team group

Buddy replies only when it's mentioned and sticks to tasks, projects and people. Money, clients and leave stay out of the group.

Daily Pulse

Each evening Buddy asks every teammate “How did your day go?” and turns their reply into task updates. Ask “how did the team's day go?” to see the answers.

Message a teammate

“Text Riya about tomorrow's task” becomes a card with the exact message. Nothing is sent until you tap Send, and private details are never sent.

Checked every time

Buddy checks each message against the person's live access. Remove someone from the company and their Telegram access ends straight away.

It keeps working between your messages.

Buddy now follows work through without being asked. It reminds people before a deadline, follows up when one is missed and tells you what is still stuck. Your company's autonomy policy decides what it can do alone and what waits for your approval.

↻ Follow-through on a task

1 **Kickoff** — Tells the owner what's expected and when.

2 **Due day** — A reminder on the morning it's due.

3 **Overdue** — One follow-up for each missed deadline.

4 **Escalate** — Tells the founder, privately.

✓ **Done** — Lets you know when it's finished.

Before each step it checks the task again. If the task is already done or the deadline has moved, it says nothing.

◔ Reminders & follow-ups

Sent to the owner on Telegram before a deadline and after a missed one. Admins can have them posted in the team group with the person tagged.

☰ Founder digest

One private message a day listing the work that's overdue the longest, sent only when that list has changed.

◷ Scheduled checks

“Remind me Friday at 10” or “check the overdue invoices every Monday and tell me”. Buddy does it and reports back.

§ The autonomy policy, per company

ON ITS OWN	Routine reminders and follow-ups to teammates: short, and nothing about money, pay or private details. Every one is logged with the rule that allowed it.
NEEDS APPROVAL	Anything involving money, email or finance, and anything your company hasn't allowed. The right person gets a card and the action waits for their tap.
NEVER	Deleting anything, and anything the person it acts for isn't allowed to do. No company setting can change this.
OFF SWITCH	One switch turns all autonomy off. After that, everything goes back to waiting for your approval. Quiet hours and a daily message limit per person keep it polite.

What's in v0.01 Beta.

Everything below works today on phone and desktop. New since the September preview:

- Home: a command centre for the company
- Business hub for money and clients
- Multi-step plans you approve once
- Live views built from your real numbers
- Buddy on Telegram: private chats and groups
- Daily Pulse check-ins with your team
- Reminders, follow-ups and a founder digest
- Five sections: Home, Work, Buddy, Business, Team
- A bold new look across the app
- “Buddy noticed” insights with next steps
- Payment reminder emails from chat
- Teammates on Telegram with no login
- Message a teammate on Telegram
- Autonomy policy with approvals and an off switch

SINCE THE FIRST BETA

- AI cofounder chat with a daily brief
- Confirm-first action cards with undo
- Slash commands and a quick + menu
- Invoices, quotations and proformas
- Transactions, bills, vendors and items
- Client pipeline, tasks, team and letters
- Six cofounder personalities with their own voices
- Voice calls with a live transcript
- Company memory with cited answers
- Client portal for viewing, accepting and paying
- Reports: 6-month trend, P&L, GST
- Guided onboarding in about two minutes

Our promise: your cofounder never changes your books on its own. It drafts the change, you confirm it, and you can undo it. When it acts alone, it's only routine messages your company allowed, and every one is logged.

Private to your company

StartupBuddy v0.01 Beta

It's a beta. Tell us what breaks.

Features and screens may change between releases. Screens in this guide use sample data from a demo company called Kite Labs.
